#### **ENVY – AgroBest - in 500ml bottles - \$22.00**

Envy is a unique water emulsifiable polymer which can be used on plants to form a semi-permeable, biodegradable film, which reduces transpiration and protects plants from climatic extremes.

Envy can increase frost tolerance & reduce moisture loss, reducing drought stresses. It will not impede photosynthesis and normal plant growth.

Convenient sized bottle – ideal for reveg projects and private landholders.

#### **BREAKDOWN – Earthlife - in 1 Litre bottles \$20.00**
